

# How to use Yahoo People Search

Objective: Learn to use Yahoo People Search with name info

## Resources:

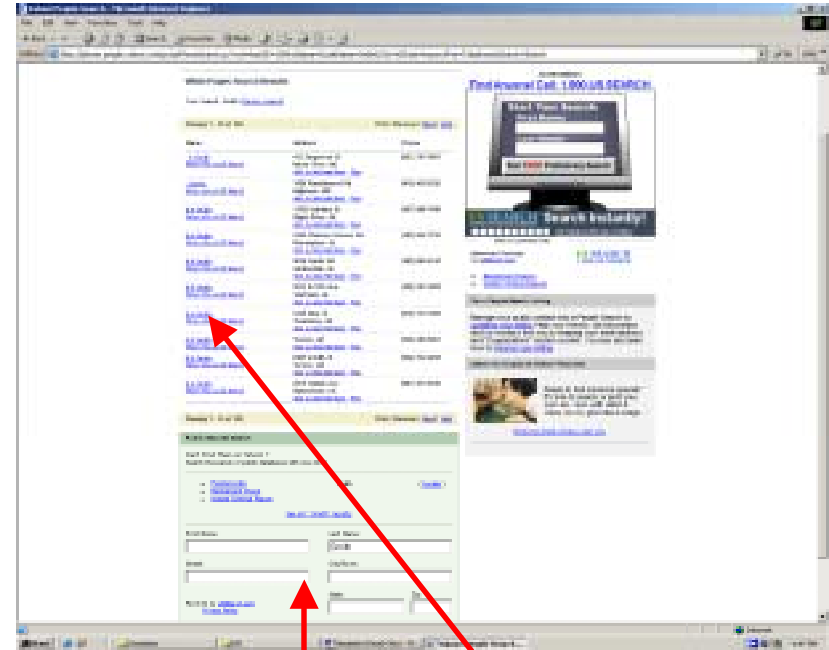

- Internet Basics
- Internet Explorer

## How to use Yahoo People Search

1. Open a web browser (Internet Explorer or Netscape Navigator). Go to **Start** → **Programs** → **Internet Explorer**
2. Type [www.people.yahoo.com](http://www.people.yahoo.com) in the address field and hit **Enter**
3. Type in **name** of person trying to search (last name required).
4. Type in **city/town** and/or **state** (if known)
5. When you are finished click on **Search**

6. Next you will see a displayed list of names and addresses:

7. If you click on a specific highlighted name you will be taken to a web page with more information on that person.

8. You can also use **US Search** from this page. US Search will search databases outside of Yahoo People Search for the person you are trying to search.

On the individual name description page you are given the name, address, map, and telephone number.

Alternatively, click back to the previous page where you can select another name.

**Tips:**

a) Select **US Search** for wider search options outside of Yahoo.

b) Sign up for a **FREE Yahoo People Search** account to enable you to make an address book and more options.

On the Yahoo People Search account page, fill in the blanks and Good Luck!
